# Cards on Corpay Complete

## Completed Work Stories

### Description

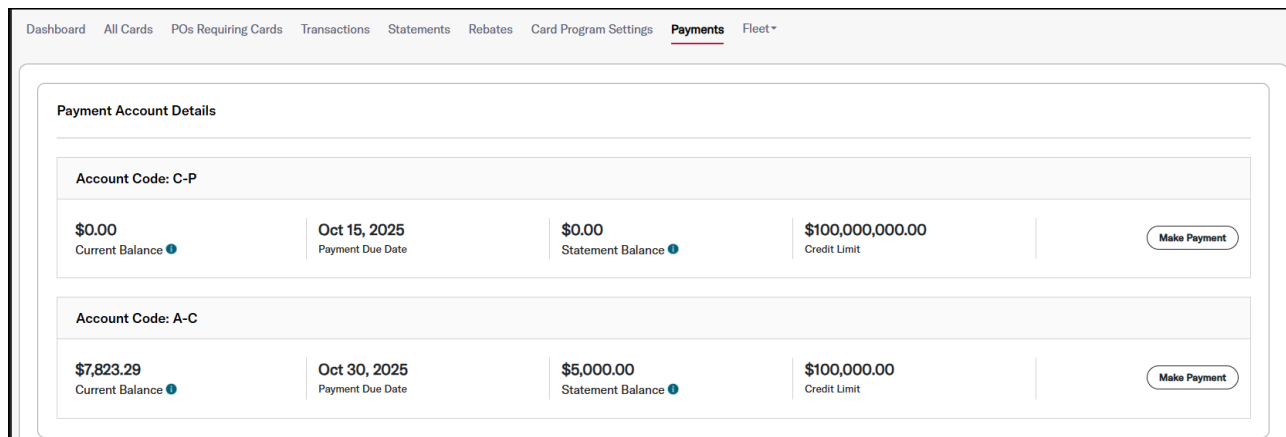

#### Pay Down Phase 2

The updated card payments feature gives admin users a simple way to enroll their bank account via Plaid and apply payments toward outstanding account balances, immediately seeing the impact after their payment is submitted. This allows for greater visibility and control over card balances and payments.

*Please note that this feature must be configured by the Corpay team and will not be enabled by default. Currently only credit-based customers are eligible to use this feature - it is not available for prefunded customers.*

#### Updated Card Payment Experience

Admin users can easily navigate to the Payments tab in the card module and view eligible balances for all their company's accounts in one place, and initiate payments as needed from the Payment Account Details view.

The screenshot displays the 'Payments' tab in the Corpay interface. The navigation bar includes: Dashboard, All Cards, POs Requiring Cards, Transactions, Statements, Rebates, Card Program Settings, **Payments**, and Fleet. The main content area is titled 'Payment Account Details' and lists two accounts:

Account Code	Current Balance	Payment Due Date	Statement Balance	Credit Limit	Action
C-P	\$0.00	Oct 15, 2025	\$0.00	\$100,000,000.00	Make Payment
A-C	\$7,823.29	Oct 30, 2025	\$5,000.00	\$100,000.00	Make Payment

## Flexible Payment Application

Supports both partial and full paydowns, allowing admins to choose how much they want to apply toward their balances.

### Payment Amount

Your last payment was \$0.12 on Jan 21, 2026

---

Statement Balance \$5,000.00

Current Balance \$7,823.29

Other Amount \$

### Payment Method

Your payment is due on Oct 30, 2025

---

Payment Method

Checking (\*\*\*\*1111) x | v

## Clear Review & Confirmation

A review step summarizes the payment details, including remaining balances, before submission.

### Review Payment Details

## View Payment History and Details

Previous payments are visible in the Payment Activity grid, so admins can easily see if a payment was successfully posted. Clicking on the Payment Number link will open a modal with detailed information on the payment, payment method, and the user that initiated the payment for audit and tracking purposes.

## Manage Payment Methods and enroll bank accounts via Plaid

Under the Payment Methods section, admins can click on Add Bank Account to quickly enroll their payment account through Plaid via instant or manual verification. Instant-enrolled accounts can be updated at any time by clicking the Update Account link in the Connection Status column. Any connected account in this view can be used to make a payment toward a card account balance.

## Completed Bug Fixes

### Description

#### Temporary Limit Sync to HOST

An issue was corrected where temporary spending limits scheduled for future dates were not being applied to cards as expected. This bug only happened for temporary spend limits scheduled to start on a future date. The system now reliably sends temporary limit updates to HOST even when additional card changes occur after the limit is set. Users will now experience accurate limit activation, reducing declined transactions and avoiding manual workarounds.

## Expenses on Corpay Complete

### Completed Work Stories

Description
<p><b>Receipt Upload Modal Count Improvements</b></p> <p>The receipt upload modal now displays the number of receipts in a clearer, encircled format that improves visual understanding compared to the previous slash-style formatting. Users benefit from a more intuitive, readable interface when uploading receipts from the queue.</p>
<p><b>Default Expense Grid to Unsubmitted</b></p> <p>The expense grid once again defaults to the “Unsubmitted Expenses” view, helping users quickly identify expenses that still need attention. This improves workflow efficiency, especially for those managing high volumes of expense items.</p>
<p><b>Updated Expense Help Button</b></p> <p>The “Expense Report Help” button has been renamed to “Expense Help,” and its link now directs users to the updated Expense Module help center. This ensures clearer guidance and quicker access to relevant instructions, improving onboarding and troubleshooting.</p>

# Invoice Automation on Corpay Complete

## Completed Work Stories

Description
<p><b>Description Field Filtering</b></p> <p>Filtering by Description in the All Invoices grid now supports keywords and symbols, allowing users to find invoices more efficiently. This is especially helpful for customers who depend on symbol-based search conventions.</p>
<p><b>Credit Memo Inbox Memo Column Added</b></p> <p>A Memo column was added to the Credit Memo Inbox grid. This gives users additional context at a glance without opening each record. The update streamlines credit memo review workflows.</p>
<p><b>Vendor Classification Partial Match Filtering</b></p> <p>The Vendor Classification field, on the All Invoice Grid, now supports partial-text, case-insensitive, and mid-string filtering. Users can quickly locate invoices by typing any portion of a classification name, making searches significantly faster and more intuitive.</p>
<p><b>Improved Line Item &amp; Expense Grid Layout</b></p> <p>Custom field widths on PO, Invoice, and Expense grids have been adjusted to improve visibility of new metadata columns. This layout enhancement helps users review details more easily, reducing scrolling and data lookup time.</p>

## Completed Bug Fixes

Description
<b>Copying Credit Memos with Metadata</b> Users can now copy credit memos that include metadata links without encountering system errors. This fix prevents workflow interruptions and allows credit memo creation to proceed smoothly.

## Payment Automation on Corpay Complete

## Completed Bug Fixes

Description
<b>Vendor Tracker Quick Filters Restored</b> Quick Filters on the Vendor Tracker Grid now function correctly, allowing users to filter vendor records without unexpected failures. This restores the intended filtering experience and improves navigation efficiency.
<b>Accurate Totals in Payment Reports</b> Exported payment reports now calculate "Totals" correctly, even when rows contain identical payment amounts. This fixes prior inaccuracies that caused confusion when reconciling totals. Users can now trust exported reports to reflect true values.
